pinned project

Marketplace with 1+ Million Products Built on Magento Community, My contributions are as Core Backend Developer from start to completion. I wrote Mobile API's, customized Checkout Flow, Modules Development, Extensions, Theme Customizations. Integrations, Products Import, Main Design, Appearance category pages, filters

This is a Multi Store Magento Project, Arabic and English stores. In this Project From a Proposal to Delivery, everything I did as Team Lead and Sr. Magento Developer. Custom things were in this "Gift Card generation" and other than that some normal customizations from Client.

<https://bomb.ae>

From Backend, Frontend, Customizations I wrote every line of customized code on this website, infact first time I did this much Frontend alognside my Backend skills.

Other than that my work in PHP Magento, Shopify and custom PHP is following:

<https://www.bobux.eu/> Magento Enterprises

<https://www.lk.co.nz/> Magento Enterprises

<https://skinn.com/> US Canada Brand[Shopify Plus]

<https://www.ibaset.com/> US Military Contractor[Wordpress]

<https://www.cookandbathe.com.au/> Australian [Magento]

Featured Extensions

These are some of Extensions I developed for Magento2

Languages and Technologies

Langs: **PHP, JQuery, API's,**

Version: **M2**

Tools: **PhpStorm, Atom**

Version control: **GOGS**

WhatsApp Chat Extension Magento 2

You can get WhatsApp sticky on your Magento Store and even Multistore with Custom Languages and Logo and Number Customizations.

Category listing Widget for Home Page Magento 2

you can get populated Products from Specific selected Categories to any page any place and also you can select filters type like if wanna show BestSellers, Sale, Featured type or what you wanna Display.

BuyNow Button Magento2 Free Extension

With BuyNow Button End-User will be able to on a single click Add products to cart and then redirecting to Checkout without going to Cart page actually. To reduce steps and increase sales analytics this is perfect.

Hide Meta Title in Magento 2

With our free extension you can get removed Meta title which sometimes required by SEO analysts for purpose.

SocialLoginApi Extension Magento2

SocialLoginApi returns response by adding user from Facebook and Google by either Logging into or Registering and returning their Tokens to response.

Add Category Attribute in Magento 2

To Add attributes to your Categories in Magento2, you can use Our Magento Extension.
